INVENTA-FISCHER AG further successful in China

The Swiss Engineering Company INVENTA-FISCHER AG (formerly EMS-INVENTA AG) – a member of the EMS-group which activities lie in the field of performance polymers, fine chemicals and engineering – was awarded another contract from China.

The contract covers the design and supply of a complete plant for the production of 45'000 tons of polyester filament annually. INVENTA-FISCHER AG will also furnish the technology and delegate its specialists for the supervision of the erection and the commissioning of the plant.

The value of this order is estimated at CHF 35.0 mio. The plant - to be operated by GUANGDONG KAIPING CHUNHUI CO. LTD. - will be located at Kaiping City, Guangdong Province. Start of production is scheduled for the beginning of 2002.

INVENTA-FISCHER AG has already designed and supplied 11 industrial plants for the manufacture of synthetic fibres to this company.
